7	There is no support because everyone judges you for the substances you use because revelstoke is such an terrible place to be for your childhood. Because everyone uses substances and everyone is so fucking terrible towards each other and their actions.... no one looks out for one another and people are way to judgemental about anything you do so its hard for someone to be themselves. It is hard because people act differently to try to be the person everyone wants them to be..	11/30/2017 9:58 AM
